St Mary's RC Primary School: Strategic Marking and Feedback Policy

Excellence, inspired by Gospel values

Headteacher: Mr David Miller

Chair of Governors: Mrs Joanna Marshall

Date: September 2020

Date for Review: September 2021

Marking and Feedback Policy

At St Mary's RC Primary School, we recognise the importance of feedback as an integral part of the teaching and learning cycle, and aim to maximise the effectiveness of its use in practice. We are mindful also of the research surrounding effective feedback and the workload implications of written marking, as well as research from cognitive science regarding the fragility of new learning.

Our policy is underpinned by the evidence of best practice from the Education Endowment Foundation and other expert organisations. The Education Endowment Foundation and other expert organisations. The Education Endowment Foundation research shows that effective feedback should:

- Redirect or refocus either the teacher's or the learner's actions to achieve a goal
- Be specific, accurate and clear
- Encourage and support further effort
- Be given sparingly so that it is meaningful
- Put the onus on students to correct their own mistakes, rather than providing correct answers for them
- Alert the teacher to misconceptions, so that the teacher can address these in subsequent lessons.
- Provide guidance on how to improve and not just tell learners when they are wrong

Notably, the Department for Education's research into teacher workload has highlighted written marking as a key contributing factor to workload. As such we have investigated alternatives to written marking which can provide effective feedback in line with the EEF's recommendations, and those of the DfE's expert group which emphasises that marking should be: Meaningful, manageable and motivating. We have also taken note of the advice provided by the NCETM (National Centre for Excellence in Teaching Mathematics) that the most important activity for teachers is the teaching itself, supported by the design and preparation of lessons.

Key principles

Our policy on feedback has at its core a number of principles:

"The only good feedback is that which is acted on"

Dylan William

- The sole focus of feedback should be to further children's learning;
- Evidence of feedback is incidental to the process; we do not provide additional evidence for external verification;
- Written comments should only be used where they are accessible to the learners according to age and ability.

- Written comments should only be used as a last resort for the very few children who otherwise are unable to locate their own errors, even after guided modelling by the teacher.
- Feedback delivered closest to the point of learning is most effective, and as such feedback delivered in lessons is more effective than comments provided at a later date;
- Feedback is provided both to teachers and learners as part of the assessment processes in the classroom and takes many forms other than written comments;
- Feedback is part of the school's wider assessment processes which aim to provide an appropriate level of challenge to learners in lessons, allowing them to make good progress;
- All learners work should be reviewed by teachers at the earliest appropriate opportunity so that it might impact on future learning.
- Feedback should empower children to take responsibility for improving their own work; it should not take away from this responsibility by adults doing the hard thinking work for the pupil.
- New learning is fragile and usually forgotten unless explicit steps are taken over time to revisit and refresh learning. Teachers should be wary of assuming that children have securely learnt material based on evidence drawn close to the point of teaching it. Therefore, teachers will need to get feedback at some distance from the original teaching input when assessing if learning is now secure.

Within these principles, our aim is to make use of the good practice approaches outlined by the EEF toolkit to ensure that children are provided with timely and purposeful feedback that furthers their learning, and that teachers are able to gather feedback and assessments that enable to adjust their teaching both within and across a sequence of lessons. Our approach is applied across all subjects and in every year group.

Feedback and marking in practice

It is vital that teachers evaluate the work that children undertake in lessons, and use information obtained from this to allow them to adjust their teaching. Feedback occurs at one of four common stages in the learning process:

1. Immediate feedback - at the point of teaching
2. Summary feedback - at the end of a lesson/task
3. Next lesson feedforward - further teaching enabling the children to identify and improve for themselves areas for development identified by the teacher upon review of work after a previous lesson had finished
4. Summative feedback - tasks planned to give teachers definitive feedback about whether a child has securely mastered the material under study

These practices can be seen in the following practices:

Type	What it looks like	Evidence (for observers)
Immediate	<ul style="list-style-type: none"> • Includes teacher gathering feedback from teaching within the course of the lesson, including mini-whiteboards, bookwork, etc. • Takes place in lessons with individuals or small groups. • Often given verbally to pupils for immediate action. • May involve use of a teaching assistant to provide support of further challenge. • May re-direct the focus of teaching or the task. 	<ul style="list-style-type: none"> • Lesson observations/learning walks
Summary	<ul style="list-style-type: none"> • Takes place at the end of a lesson of activity. • Often involves whole groups or classes. • Provides an opportunity for evaluation of learning in the lesson. • May take form of self or peer-assessment against an agreed set of criteria. • May take the form of a quiz, test or score on a game. • In some cases, may guide a teacher's further use of review feedback, focusing on areas of need. 	<ul style="list-style-type: none"> • Lesson observations/learning walks • Some evidence of self - and peer-assessment • Quiz and test results may be recorded in books or logged separately by the teacher
Feedforward: 'the next step is the next lesson'	<ul style="list-style-type: none"> • For writing in particular, often a large part of the next lesson will be spent giving feedback to the class about strengths and areas for development, and giving time for development areas to be worked on and improved through proof reading and editing their work. • Do now's are analysed daily and errors and misconceptions addressed in subsequent lessons, in particular in maths meetings. 	<ul style="list-style-type: none"> • Lesson observations/learning walks • Evidence in books of pupils editing and redrafting their work in green pen
Summative	<ul style="list-style-type: none"> • 'Check it' activities. • End of unit or term tests or quizzes. 	<ul style="list-style-type: none"> • Check it activities in books

		• Quiz and test results
--	--	-------------------------

Approaches to marking work

All pieces of work will be acknowledged in some form by class teachers; it is not expected that this will be in the form of written feedback as there is no evidence that this is effective. This may be through verbal comments, simple symbols such as ticks, highlighting of LO or aspects of work checked and assessed via 'live marking'. Where annotations are appropriate, the intention is that **MINIMUM** teacher time should lead to **MAXIMUM** outcomes. One way that this is achieved is through the use of our marking code, which combines highlighters and symbols. The core of this code is set out below.

Marking Code

Green Highlighter	Aspect of work that demonstrates element of success criteria, skill or intended outcome
Pink Highlighter	Further attention required - improvement or correction required (CL, word choice, calculation error)

Guidance for teachers

Feedback in English

All 'Big Write' lessons are quality marked in depth by the class teacher. All other lessons are assessed via 'live marking during the lesson which is indicated through coloured highlighting and a key word or phrase to remind the children of their mini target. Every lesson will start with a teacher led and modelled 'up levelling' session. This session is condensed ten minute version of what is outlined below but following the modelling the child up-levels their own work in green pen.

Most 'Big Write' writing lessons will be followed up with a dedicated editing lesson where children receive whole class feedback about strengths and areas for development and direct teaching about to help them identify and address their own weaknesses.

Teachers will have looked at pupils' work soon after the previous lesson and identified strengths and weaknesses, looking at both the technical accuracy of the writing; spelling errors, punctuation omissions, and other transcription mishaps as well as things to do with the sophistication of the writing; the actual content. Where individual children have done particularly well or badly at something, s/he will make a note and use these in the lesson as a teaching point.

The editing lesson will be divided into two sections

➤ Proofreading

Changing punctuation, spelling, handwriting and grammar mistakes.

➤ Editing

Improving their work to improve the composition.

The proofreading section will usually be short: about 10 minutes or so, whereas the editing element may take the rest of the lesson.

The teacher will share extracts from pupils' work, using either the visualiser or by scanning in pupils work and displaying them on the interactive whiteboard, at first showing good examples of work. For example, within the proof-reading section, the teacher might showcase someone whose letter heights have the ascenders and descenders just right, then asking pupils to look at their work and rewrite one sentence from it, really making sure they are paying attention to letter heights. Then s/he might share a section of text with poor punctuation (usually anonymously) and reteach the class the various punctuation rules. They might then point out some spelling errors that several children are making, and remind children of the correct spelling and how to remember it along with the correct spelling rule. Children will then have a short period of time to proof read their work, checking for similar errors and putting them right.

Within the editing section of the lesson. For example, the teacher might show a different couple of pieces of work where children have described a character very well, pointing out what it is that has made the description so vivid. The teacher might then share a less good example which might be from an anonymous or fictional piece. The children would then suggest together how this might be improved. Then in their pairs they read together each other's work, and suggest improvements, alterations and refinements which the author of the piece then adds - in green pen to help the teacher see what changes the child has made.

Feedback in Maths

Teachers gain valuable feedback about how much maths teaching is being retained in the longer term from the daily 'do now' sessions at the start of lessons, comprising of an Elephant (a question from a previous academic year), Dog (a question from a previous unit of Power Maths within the same academic year) and Fish (a question from the previous day). This information should be used to revisit areas where learning is not secure within maths lessons or Master Class sessions. 'Check its' (short informal tests replacing a 'do now' session) are given at least 3 weeks after teaching a unit allow the teacher to assess knowledge retention. End of unit tests also provide vital feedback to the teacher about areas that might need more teaching for certain individuals either in class or through an intervention.

In terms of day to day teaching teachers quickly live mark fluency questions from Power Maths work books (all children have differing starting points and do not answer all questions). Teachers are expected to speak to as many pupils as possible offering 1:1 feedback during this period. That way, if they have got the wrong end of the stick and misunderstood something, the teacher is alerted immediately. A key benefit here is that less confident children might want to start at the easiest level of work provided, but with instant feedback available, after getting their first few calculations correct, they feel confident to move to the next level. Conversely it allows more able pupils to move to application of skills via reasoning and problem-solving challenges in their Mastery

journals. Marking in Power Maths books is never quality marked but simply highlighted green or pink.

The focus of Maths marking is primarily the reasoning answers. As Daniel Willingham says 'memory is the residue of thought.' So as an alternative to providing the answers, teachers begin every lesson similar to an English lesson where they use the visualiser/ scanned work to model ways of checking and then expect children to do the same, in effect 'proof reading' maths. For example, the word 'sum' should not be used when discussing a subtraction question. The word 'borrow' should never be used when discussing subtraction as this implies something will be given back at some point which is untrue - marking and discussion would focus on the process of exchanging here. Teachers use reasoning marking to promote and reinforce correct age appropriate mathematical vocabulary. The onus is always on the learner checking their work and if they've got an answer wrong, trying to identify their own errors. Children need to be taught how to do this purposely; otherwise they think it just means scanning quickly through their work, reading but not really thinking. Checking involves thinking deeply about the work you have just learnt. When you think deeply about something, it is much more likely to get stored in your long-term memory, available to be recalled at will.

With 2 or 3 part word problems, a classic error is to give the answer as the first part of the problem and forget about following through to the second (or third) part of the question. Often, word problems are written with each instruction on a different line, a bit like success criteria. Again, using a visualiser, teachers should show children how to check work as we go, returning to the question and ticking off each line - writing each answer alongside, being really clear we are answering the final question, having done all of the previous steps. When marking word problems scaffold examples will be provided when appropriate.

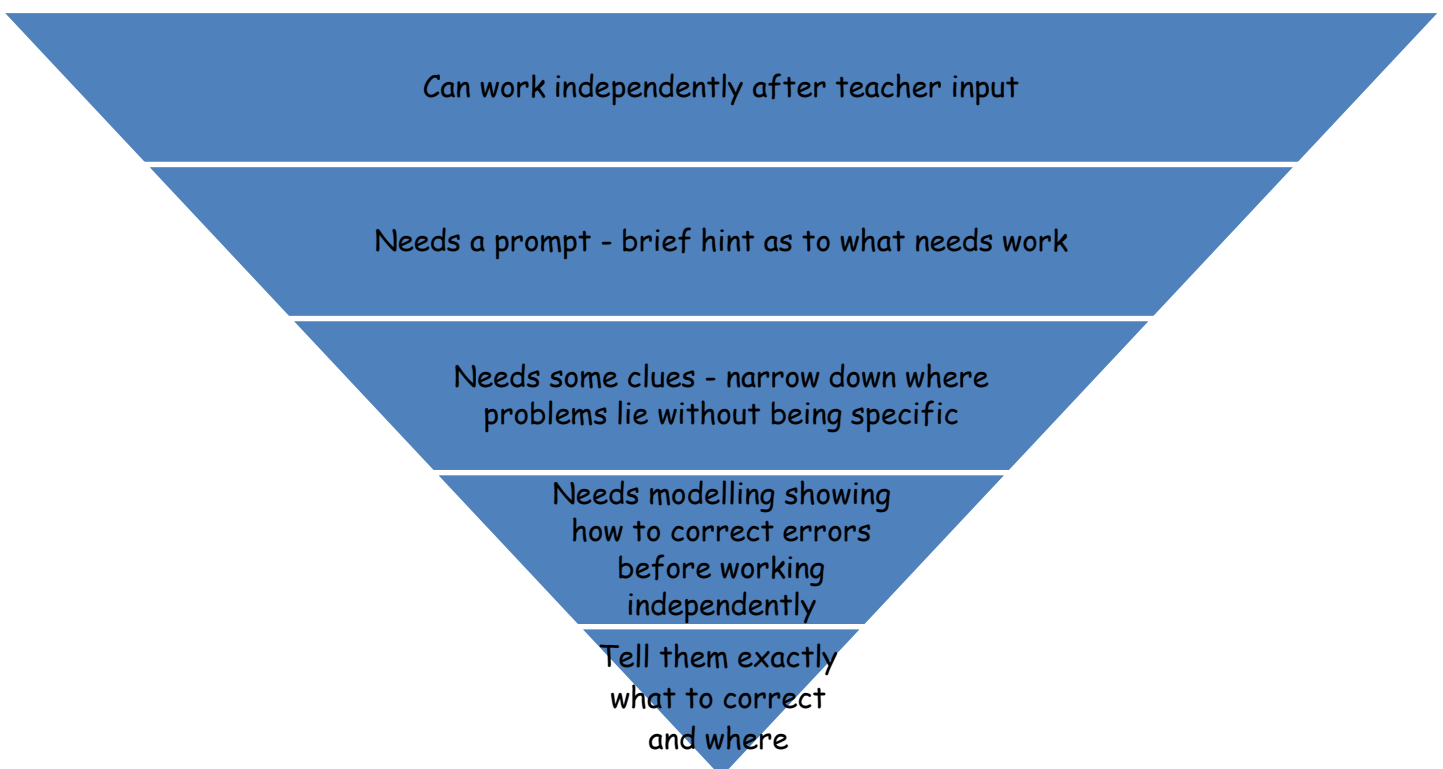

Where children have made mistakes, and are finding it hard to identify where they have gone wrong, a prompt sheet (Appendix 2), shared with the class at the start of the lesson, can help. In effect, this is just a process success criteria, but recasting it as a checklist to be used to identify errors means children use it thoughtfully and only when needed.

Intervening when children find editing hard

As with all intervention, teachers should always seek to use the minimal level possible, only escalating to the next level if the child still needs further support. Some children may need a gentle prompt to narrow down their focus when looking for mistakes, for example a written comment alerting them that there are some missing full stops, without telling them how many or where. Or a simple pointer - 'description' perhaps or 'ambiguous pronouns' or 'figurative language' or 'and then' with a red cross through it. This would be in addition to, and not instead of, the teacher modelling editing for these before the independent section of the lesson. Others might need even more support and need to be provided with clues to help them. For example, the teacher might need to draw a pink box around a section of text to narrow down the search area for the pupil, alongside the comment that there are speech marks missing or tenses jumped or the same sentence

structure over-used. Or they might need to write a comment at the end saying there are 8 run-on sentences or 5 instances of non-standard English. In KS1 and for some Reception children, premade stampers are available to prompt children to look for certain mistakes. The 'Crimes Against Writing' prompt sheets (see appendix) should be used with KS2 classes until these basic skills are securely in place for most of the class. Certain individuals may need to carry on referring to these longer until the checklist is thoroughly internalised.

The strategical minimal marking triangle

Sometimes it is children who find writing easy who do not challenge themselves to improve their writing through editing, settling too readily for their first attempt. These children may initially need specific clues about what an even better piece of writing might look like.

- Set group or individual challenges, "before you've finished editing, you need to have..."
- Use their work in modelling and then expect them to do the same.

Monitoring and Reviewing

The Marking and Feedback Policy will be reviewed on an annual basis.

This policy was reviewed by Governors on: 4th November 2020

cRimE's aGainst! WrighTin?

Have you committed any writing crimes?

Proof-read your work and correct these mistakes to fix any crimes against writing!

It is a crime to forget that:

- Every sentence starts with a capital letter.
 - Every proper noun starts with a capital letter.
 - We do not need random capital letters in the middle of words.
 - All sentences must end with punctuation. . ! ? ...
 - **I** is always a capital letter when alone or in a contraction as a pronoun.
- Questions always end with a **?**
 - Contractions always need an apostrophe to replace the missing letter or letters. For example: **don't** **wouldn't** **can't**
 - You only need an apostrophe before an s if you are showing something belongs to something else. For example: **The boy's coat, the horse's leg, the school's badge.**

It is a crime to forget that:

- Past tense verbs must be spelt correctly - remember sometimes it sounds like **id**, **t** or **d** but is spelt **ed**.
 - We use **an** before words beginning with a vowel and **a** before words beginning with a consonant. For example, **I saw an elephant and a giraffe.**
- We use **was** when the subject is singular (one person or thing) and **were** when you are writing about more than one person or thing. For example, **Today was amazing, we were so lucky to go on that trip.**

Appendix 2:

Example Maths Prompt Cards

Find my mistake

Column Addition

- Did I put each numeral in the right place value column? Check each one.
- Did I forget to regroup?
- Did I forget to add the regrouped ten (or hundred)?
- Did I make a silly error with my adding?
- If you can't find your mistake, ask your partner to go through this checklist with you and see if they can help
- If you are still stuck, is there another child who looks like they are confident with this you could ask?
- If none of this works, ask an adult for help

Find my mistake

Identifying Fractions of Shapes

- Did I check all the parts were equal?
- Did I count how many parts the shape had been divided into?
- Did I write that number underneath the vinculum (remember denominator → down)
- Did I count how many parts were shaded in?
- Did I write that number on top of the vinculum (remember numerator → on top)
- If you can't find your mistake, ask your partner to go through this checklist with you and see if they can help
- If you are still stuck, is there another child who looks like they are confident with this you could ask?
- If none of this works, ask an adult for help

It is important that the children move towards internalising what they are doing (over the course of several lessons) so that they no longer need a written checklist because they have their own mental checklist stored in their long-term memory, which they are able to retrieve at will.

Giving children work to 'mark' from fictitious other children, which includes all the common misconceptions, is a really good way of helping them develop this.
